

B'cont.

2.126 43.

44. (New) Process according to Claim 24, characterized in that the phosgene and/or its precursors are introduced gradually.

2.126 44.

45. (New) Process according to Claim 24, characterized in that the solvent is acetonitrile.

2.126 45.

46. (New) Process according to Claim 24, characterized in that it is performed with anhydrous compounds and under anhydrous conditions.

2.126 46.

47. (New) Process according to Claim 24, characterized in that the liquids condensed by the condenser are recycled into the reaction medium.

2.126 47.

48. (New) Process according to Claim 39, characterized in that the aliphatic alcohol is chosen from the group comprising tert-butanol, benzyl alcohol, adamantanol, fluorenylmethanol, tert-amyl alcohol and allyl alcohol. --

Please amend claim 29 as follows, a marked-up version of amended claim 29 is attached:

29. (Amended) Process according to Claim 23, characterized in that, when it is a solid, the fluoroformate is obtained in crystalline form by adding to the fluoroformate solution a compound which does not dissolve the fluoroformate, chosen from apolar aprotic solvents, after which the fluoroformate is made to precipitate.
